CLOUD PRINT: AN ESSENTIAL PIECE OF THE DIGITAL TRANSFORMATION PUZZLE

Today, the workplace is wherever and whenever people want it to be. The demand for flexibility and seamless connectivity has never been higher – with no sign of slowing. Businesses that embrace digital transformation will benefit from a range of competitive advantages, including: increased customer experience, enhanced process efficiencies, improved business decision making, and better agility and innovation.

Cloud computing plays a vital role in the digital transformation of every industry. Yet, companies are still missing the critical final piece of the cloud puzzle: **Cloud Printing**.

Our Cloud Print Services accelerate your digital transformation journey. They streamline your print infrastructure, eliminate print servers and incorporate cloud technologies with ease – so our solutions offer optimal security and flexible printing options while also reducing the workload of your IT staff.

Dispatcher Paragon is one such solution in our portfolio. It offers print management in the cloud, tailored to the needs of small and medium-sized businesses.

MORE FLEXIBILITY FOR YOUR PRINT INFRASTRUCTURE

Dispatcher Paragon Cloud is a secure Software-as-a-Service offering, enabling you to simplify print operations and modernise your print infrastructure. It optimises your cost structure and overview through a fixed regular fee whilst providing the benefits of an on-premise print management solution – without compromising in security.

Efficient infrastructure

- Perfect for companies with less than 200 MFP devices
- Multiple customers in a shared and secured server environment at lower costs
- No need to build a Server infrastructure within your company
- The Pure Cloud offering via Intelligent Web Service (IWS) enables immediate service, without the need to install software or hardware

Cost planning and structures

- No big investment into IT infrastructure needed
- Optimises your IT resources
- All-in-one monthly or annual fee per device, no hidden costs
- Automatic reporting enables a clear view of all print/scan/copy activities

Productivity

- Designed to be simple to deploy, configure, and maintain via Konica Minolta MarketPlace
- Centralised user and authentication management for easier administration
- Frees up your IT staff from repetitive tasks like server management and product updates, so they can focus on strategically developing the IT environment

Security & Compliance

- Protection against failures with redundancy within a single data center in the event of hardware malfunctions or software update cycles
- End-to-end encryption via Microsoft Azure
- Each tenant has own resources, meta-data identification, data separation and protection
- Support of GDPR requirements

AT-A-GLANCE FEATURES

Dispatcher Paragon Cloud is always on, always up to date and always secure. Moving your print infrastructure to the cloud has never been easier.

CENTRAL USER AND ROLE MANAGEMENT

- Easily assign print, scan and copy rights to users
- Authentication management options (User access is simple and familiar through the printer's user interface)

ACCESS AND DOCUMENT SECURITY

- Authentication requirement protects against unauthorised access to devices and services
- Print documents can only be released to an authenticated user at the device.

PULL-PRINTING

- Once print jobs have been transferred to Dispatcher Paragon Cloud, the print job can be released from any networked MFP

COST REDUCTION OPPORTUNITIES

- Jobs submitted but no longer needed are purged which reduces costs and consumable waste
- Enforce print governance with a library of predefined cost saving rules such as forced colour to black/white, single to doublesided or sending print jobs to most economical printers
- Create unique rules based on printing needs

DETAILED OUTPUT AND COST REPORTING

- Detailed overviews of usage by user or groups of users which allows for easy management of printing costs
- Daily, weekly or monthly (or longer) reports on demand or scheduled
- Data easily exported in various formats

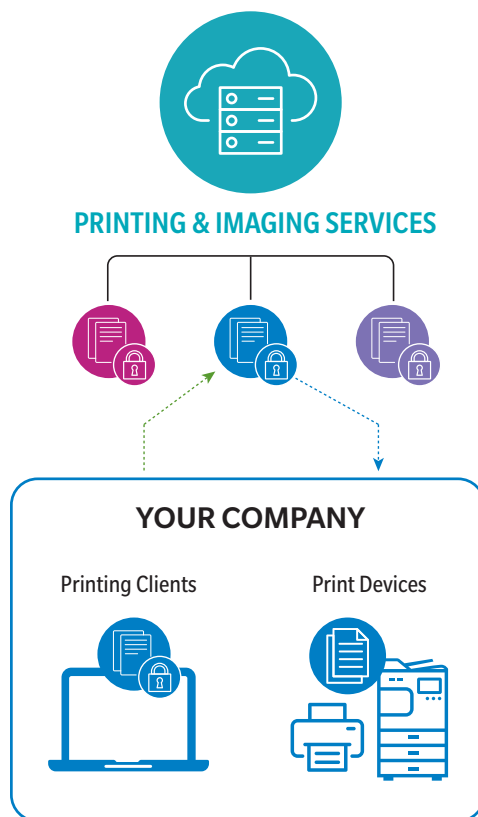

SEAMLESS OPERATIONS

- No need for IT staff to take care of any updates
- Software and server are always up-to-date through automatic security and feature updates

PRINTING IN THE CLOUD ENVIRONMENT

No matter which industry your business is operating in: Thanks to the flexible cloud environment, you can save valuable office space and IT resources that are normally needed for servers. Simply print as usual and we take care of the rest.

Data security is a top priority for us. With Dispatcher Paragon Cloud, you will get your own protected area within a shared server landscape ensuring data separation from any other tenant.

TECHNICAL SPECIFICATIONS AND SYSTEM REQUIREMENTS OF DISPATCHER PARAGON CLOUD

Printing	<ul style="list-style-type: none"> No VPN required No client software required on workstations Platform-independent (Windows, Linux, Mac) – any platform which supports IPP

OUR COMMITMENT TO SECURITY AND PRIVACY

Supporting GDPR requirements

Print jobs processed may contain sensitive information. Dispatcher Paragon Cloud offers features for keeping your business data secure, including strong user access control to prevent unauthorised access to systems where data is stored and processed. Dispatcher Paragon Cloud supports GDPR requirements such as the right to be forgotten, the right to access, and the right to restriction.

Full end-to-end encryption

From a security perspective, Dispatcher Paragon Cloud offers you full end-to-end encryption to the cloud service by supporting the latest implementation of industry standard internet security communication protocols, such as TLS 1.3.

Full end-to-end encryption for the data links transferring sensitive data between devices connected to the Dispatcher Paragon Cloud ensure the highest possible security and compliance with regulations such as GDPR.

Zero trust networks

The Dispatcher Paragon Cloud services are completely flexible to cater for a myriad of network infrastructures including Zero trust environments based on a stringent identity verification process. This ensures that only authenticated and authorised users and devices have access to applications and data.

Data residency

With Dispatcher Paragon Cloud, data storage is within one data center, typically a data center local to your business and data is replicated among several servers within the data center. This ensures that should one server experience an outage, the data is still available on other servers.

Malware prevention

Our malware strategy begins with infection prevention by using scanners to scour every version of our software before it is released into our production environments to ensure that they are not going to be used as vehicles for malware or phishing.

RETHINK WHAT'S POSSIBLE

The world is moving, megatrends are changing our everyday life and our work – connectivity and mobility set the pace. This change needs solutions that are efficient, intelligent and simple.

Konica Minolta Cloud Print Services combine your print infrastructure with the latest cloud technology. Be prepared for upcoming challenges and make your business fit for the digital future today.

Are you ready to move to the cloud?
